Association estimates across main, sensitivity and adjusted analyses
H₀ baseline: no association
Main: supplied cleaned file (n = 285)
Spearman ρ = 0.28 [0.18, 0.38]
Sensitivity A: raw file, independent rules (n = 303)
Spearman ρ = 0.26 [0.16, 0.36]
Sensitivity B: raw file incl. rarely/never (n = 327)
Spearman ρ = 0.31 [0.20, 0.40]
Adjusted OLS: age, gender, education (n = 285)
standardised β = 0.29 [0.18, 0.40]
Abbas et al. (2024): β = 0.31
